DiD YoU Know?

Research has demonstrated that fevers
assist the healing process in several
important ways. Fevers should not
necessarily be treated. Most people
recover without specific medical
attention. Although it is unpleasant,
fevers rarely rise to a dangerous level
even if untreated. The body's natural
reaction to infection is a fever. However,
the body uses the heat from the fever to
fight the infection naturally.

Also, outdoors greatly reduces sickness
and bronchial irritation from the cooler,
fresh and non-germ air.

Backward Day

Wednesday November 19th is
Wear All Things
Backwards for our Backwards Day!!

**Please be sure children are
dressed appropriately during our
weather changes. We go outside
daily as part of our program.**

**Also, please be sure all items are
labeled. We need your help to
ensure your children's
items are used
and returned
properly.**

**Please leave toys from home at home. It is a
policy of the Department of Human Services
licensing and FITS daycare for no outside
toys due to choke hazards and toys from
home getting lost and broken. We do not
want to take the risk of these toys that may
be considered choke hazards or
inappropriate for daycare.**

**Thank you in advance for your cooperation and
understanding.**
